Evaluation report of opponent.

Candidate details:

Name: Mark Griffiths

Topic: Optimization For Algorithmic Intensive Systems On Constrained Embedded
Systems

Evaluation methods:

Technical depth in presentation:

Technical depth of the presentation is quite good. It explains the common code optimizations related to embedded systems in general. Seminar report is also well compiled.

Topic mostly touches data optimization, this could have been even better if there could be couple of slides that touch other optimizations like code & runtime optimizations in basic level.

Presentation skills:

Presentation skills are quite good and topic is well presented.
It would have been even better if oration paced little slow to enable for the whole class to understand.

Answering to audiences

All questions have been answered confidently well with in scope of the topic.

Findings:

- Topic quite well summarized.
- Presentation skills are quite good.
- Pictorial representation used which makes easier to follow.
